Product Name:

Synchro/resolver bridge

Functional Classification:

Aa-9.6

Special Features:

May have accessory pouch; rackmountable; angular range 0-360deg; angular resolution 0.0001deg; frequency 400hz; maximum input voltage 150vrms; transformation ratio 1: 1 or 9: 1; input impedance 0.5megohms

Functional Description:

Measures the electrical output of a synchro/resolver and simulates angular-oriented voltage signals used in synchro and servo systems

Entry Date:

09-10-22

Reference Data And Literature:

Pd09wrgbgbec28

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T228-a
