Product Name:

24 bit universal analog input

Special Features:

250 vrms channel to channel isolation; built in quarter, half, and full bridge support; built in voltage and current excitation; cjc per channel for accurate thermocouple measurement. 100 s/s/ch simultaneous inputs 50s/s/ch for thermocouple.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T121-a
