Product Name:

Communication analyzer

Special Features:

Instrument which measures the complex transmission and reflection characteristics of two-port devices in the frequency domain; samples the incident signal, separates the transmitted and reflected waves and then performs ratios that are directly related to the reflection and transmission coefficients of the two-port; frequency is swept to rapidly obtain amplitude and phase information over a band of frequencies of interest

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

A532p0
