Frequency Range Rating:

+0.003/+1000.000 kilohertz and +0.001/+26.500 gigahertz+1.000/+26.500 gigahertz

Frequency Band Quantity:

1

Frequency Channel Quantity:

1

Unit Type:

Plug-in

Mounting Method:

Plug-in

Product Name:

Synthesized function/sweep generator module

Special Features:

Options: 111 usb device side i/o interface; 115 512mb user memory; 226 phase noise measurement personality; bab apc 3.5 input connector

Supplementary Features:

Multi-jinterval sweep; multimarker modes; 1 micro hz to 60mhz ttl clock; isolated outputs; data transfer bus a16/24, d16 master, a16/d16 slave; frequency resolution 11hz

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A532p0
