Special Features:

300 mhz bandwidth; 1.2 ns rise time; 4 input channels; 2.5 gs/s sample rate per channel; 9-bit vertical resolution; 10 k standard record length on all channels; 3600 wfm/s continuous waveform capture rate; advanced triggers; front panel usb host port; 25 automatic measurements; multiple language user interface; automatic waveform anomaly detection; interface supports active, differential and current probes for automatic scaling and units; digital phosphor

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T320-g
