Overall Length:

16.800 inches

Overall Height:

7.000 inches

Overall Width:

14.500 inches

Ac Voltage Rating:

Between 100.0 volts and 120.0 volts

Frequency Rating:

Between 50.0 hertz and 60.0 hertz

Unit Type:

Standard

Special Features:

10 hz to 13.6 ghz dc coupled, 10 mhz to 13.6 ghz ac coupled; 220-240 volts; 50/60 hz available; 8.4 inch diagonal displa; 0-55 degrees c operating temperature; includes a precision frquency reference and an external source control which is used for solar stimulus-response measurements up to 50 ghz; controls signal generators via gpib, lan or usb; tracks external source with a variety of sweep modes and improves measurement accuracy with normalization and open/short calibration

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A532p0
