Overall Length:
16.800 inches
Overall Height:
7.000 inches
Overall Width:
14.500 inches
Ac Voltage Rating:
Between 100.0 volts and 120.0 volts
Frequency Rating:
Between 50.0 hertz and 60.0 hertz
Unit Type:
Standard
Special Features:
10 hz to 13.6 ghz dc coupled, 10 mhz to 13.6 ghz ac coupled; 220-240 volts; 50/60 hz available; 8.4 inch diagonal displa; 0-55 degrees c
operating temperature; includes a precision frquency reference and an external source control which is used for solar stimulus-response
measurements up to 50 ghz; controls signal generators via gpib, lan or usb; tracks external source with a variety of sweep modes and
improves measurement accuracy with normalization and open/short calibration
Shelf Life:
N/a

N/a

Unit Of Measure:

Demilitarization:

No

Fiig:

A532p0
