Circuit Current For Which Designed:

Dc

Power Source:

Internal

Display Type:

Light emitting diode

Special Features:

Measurement range: 0 to +/- 4.5a, output signal: <100uv, dc to 3khz provides ac/dc output signal, overload: red led indicates momentary or continuous overload, green led indicates power/battery condition, frequency range dc to 2khz (@-3db sine), load impedance 200 ohms, battery: 9v alkaline (approx 20 hrs life) output terminals: 2-4mm banana plugs, operating temperature: -10 to 55 degrees celsius, storage temperature: -40 to 80 degrees celsius, max conductor size: 0.180inch, module size: 4.900 inch long x 2.500 inch wide x 1.1 inch thick, probe size: 4.400 inch long x 0.600 inch wide x 1.000 inch high

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A310a0
