Special Features:

The raider xx (1khz-20ghz) is a portable, rf collection and analysis platform that can operate independently or networked as a multi-sensor system. Built with an on board tuning and processing module, embedded pc and an internal gps. Enables the system to sweep extremely fast and provide a wide array of analysis tools that can be used in a real time or post collection mode. Can be remotely monitored via any broadband connection utilizing swi?S unique monitoring software. The rxx?S small form factor and powerful analysis capabilities make it an ideal platform for multiple collection mission profiles. Whether in a single rxx mode or networked together in a mutually supporting role, this system is ideal for static or mobile collection missions. Kit includes receiver and laptop, loaded with raider software, to monitor rf environment.
