Special Features:

Raider ii (20 mhz-6ghz) is a portable radio frequency (rf) search system that's small, lightweight and powerful. Raider ii combines hardware and software components into a man-portable rf detection and monitoring system. The software application interface is designed so a user with minimal rf knowledge can operate it, but provides all the tools an experienced operator needs to accomplish the mission. Raider ii is intended to be used in a tactical military environment in electronic support (es) and passive electronic protection (ep) roles. Kit includes receiver and laptop, loaded with raider software to monitor rf environment.
