**End Application:**

Engine

**Product Name:**

Electronic test module

**Special Features:**

Displays electronic engine and vehicle subsystems data: displays engine/vehicle operating parameters: displays and stores the following: active and inactive faults, vehicle trip data, dataplate information, information on hand held computer can be downloaded to pc

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

T263-c
