Installation Design:

Rack

Circuit Construction Type:

Solid state

Special Features:

A resolution of 0.1 db. The items shall provide iff 2 pulse power from +1dbm to +20 dbm with sls pulse level controlled pulse characteristics of 0.25 to 1.3 microseconds +/-0.025 microseconds spaced 1.5 to 2.5 microseconds +/-0.025; item is programable pulsed powersource for iff and tacan aircraft test equipment calibration. Frequency range shall be 960 to 1215 mhz, for the iff they shall be 1024 to 1036 and 1084 to 1096 mhz

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A32200
