**Special Features:**

Model 6650a is a dual source highresistance meter used for measuring high, test voltages from 1 volt to 1, 000volts. Perform isolation testing, insulation resistance, and measure high value resistance standards. Instrument will be lab grade capable of state of the art ultra high resistance measurement. Operating temp 23 degrees celcius. And 20-50 percent relative humidity. Remotely controlled through a built in ieee-488.2 gpib bus interface

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**
