Height:

4.000 inches

Current Type:

Ac

Frequency Rating:

Between 50.0 hertz and 60.0 hertz

Voltage In Volts:

115.0 or 230.0

Special Features:

Used for simultaneous automatic scanning of multiple particle size ranges; sample flow rate 100 ml/minute; counts all particles 5 microns in size or larger; cart mounted; 4 digit readout; adjustable size range

Supplementary Features:

Particle counter used for the size/concentration analyzes of particles suspended in such liquids as water, polyesters, petroleum based hydraulic oils, solvents and fuels

Width:

5.250 inches

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A503u0
