Height:

7.250 inches

Current Type:

Ac

Frequency Rating:

400.0 hertz

Test Type For Which Designed:

Monitor purity of distilled or demineralized water, water/glycol solutions, and rinse from electroplating, used for measure and control of chemical concentrations

Analysis Test/measurement Range:

0.75/15.0 megohm

Depth:

10.000 inches

Voltage In Volts:

115.0

Special Features:

Meter, conductivity

Width:

8.000 inches

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A503u0
