Height:

6.000 inches

Current Type:

Ac

Frequency Rating:

60.0 hertz

Accessory Components And Quantity:

Aluminum carrying case

Test Type For Which Designed:

Demineralized water to strong acids

Method Of Analysis:

Potentiometric/ion selective electrode

Depth:

11.000 inches

Voltage In Volts:

115.0

Special Features:

Range from .2 umhos to 2.5 mhos and .2 ohms to 2.5 megohms

Width:

9.000 inches

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A503u0
