Special Features:

An instrument used to measure the change in heat content of a system accompanying a chemical or physical change

General Description:

accuracy ± 2 pct; input connection ug-23 d/u; thermophile resistance 750 ohms; power range 1 mw to 1 watt; frequency range 0-11.0 kmc; peak power 750 watts

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A23900
