Functional Classification:

Aa-8.16

Functional Description:

Used to collect, process, analyze samples of hydraulic fluid to evaluate contamination levels of aircraft and equip hydraulic systems

Entry Date:

74-09-01

Reference Data And Literature:

Na 17-15e-52

General Description:

14.500 in.L 9.250 in.W, 4.875 in.H; c/o patch test filter holder 1, filter mts, 500 ml wash bottles 2, syringe/2 way valve, 100 ml graduate cylinder 1, 5 micron pore size cellulose ester membrane white plain filters-47 mm diameter 100 and 25 mm diameter 2500, contamination stds, plastic 120 ml sample bottles 24, adapter-clamp, forceps 1, petri slides 100; w/case

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
