Height:

8.500 inches

Current Type:

Ac

Frequency Rating:

Between 50.0 hertz and 60.0 hertz

Accessory Components And Quantity:

Sensor 1

Depth:

21.000 inches

Voltage In Volts:

115.0 and 230.0

Special Features:

Low concentration particle counter mainframe with sensor; used for automatic counting and sizing of particles in low sample concentrations at a high sample flow rate; maximum particle concentration 100, 000 particles per cubic foot; sample flow rate 1.0 cubic foot per minute; mainframe suitable for 19 inch rack or table top mounting; sensor may be remotely located from mainframe

Width:

16.750 inches

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A503u0
