Accessory Components And Quantity:

Board heat-roc 1, burner test flamg 1, clamp thermometer 1, cup platform 1, disc heat roc 1, heater ful-control w/built-in auto transformer 1, hook therometer 1, plate cast iron 1

Design Type:

Open

Heating Element Current Type:

Ac

Heating Element Phase:

Single

Heating Element Frequency In Hertz:

50.0 or 60.0

Heating Element Voltage In Volts:

115.0

Heating Method:

Electrical

Thermometer Range:

+20.0/+760.0 degrees fahrenheit

Thermometer Quantity:

1

Test Unit Quantity:

1

Specification Data:

81346-astm-d92 professional/industrial association specification

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T398-b
