**Height:**

8.500 inches

**Current Type:**

Ac

**Frequency Rating:**

Between 50.0 hertz and 60.0 hertz

**Accessory Components And Quantity:**

Sensor 1

**Depth:**

21.000 inches

**Voltage In Volts:**

115.0 and 230.0

**Special Features:**

High concentration particle counter mainframe and sensor; used for automatic counting and sizing of particles in highly concentrated samples at a low sample flow rate; maximum particle concentration 100, 000, 000 particles per cubic foot; selectable sample flow rate 0.1 or 0.01 cubic feet per minute

**Width:**

16.750 inches

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A503u0
