Height:

8.500 inches

Current Type:

Ac

Frequency Rating:

Between 50.0 hertz and 60.0 hertz

Accessory Components And Quantity:

Sensor 1

Depth:

21.000 inches

Voltage In Volts:

115.0 and 230.0

Special Features:

High concentration particle counter mainframe and sensor; used for automatic counting and sizing of particles in highly concentrated samples at a low sample flow rate; maximum particle concentration 100, 000, 000 particles per cubic foot; selectable sample flow rate 0.1 or 0.01 cubic feet per minute

Width:

16.750 inches

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A503u0
