Tempurature Rating:

0.0 degrees fahrenheit and 210.0 degrees fahrenheit

Heating Element Current Type:

Ac

Heating Element Phase:

Single

Heating Element Frequency In Hertz:

50.0 or 60.0

Heating Element Voltage In Volts:

115.0

Heating Element Wattage In Watts:

900.0

Heating Method:

Electrical

Heating Element Type:

Lagless

Element Quantity:

3

Pipette Quantity For Which Designed:

3

Operating Tempurature Indicating Liquid:

White oil

Constant Tempurature Control:

Included

Accuracy Rating:

-0.50 degrees fahrenheit and 0.50 degrees fahrenheit

Liquid Circulator:

Included

Reservoir Inside Diameter:

16.000 inches

Reservoir Inside Depth:

12.000 inches

Accommodated Pipette Design:

Ostwald or ubbelohde

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T398-b
