**General Description:**

Pressures to 4500 psig, manual fraction collector, 1 meter u-shaped analytical column, sample injection syringe, 144 silicone septa, 5 perfluoroelastomer septa, uv photometer spare parts kit, oven temp range 40 to 140 degrees c, gradient elution accessory, differential refractometer

**Reference Number Differentiating Characteristics:**

As differentiated by gradient elution capability and detector

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No
