**Height:**

7.250 inches

**Current Type:**

Ac

**Frequency Rating:**

400.0 hertz

**Test Type For Which Designed:**

Monitor purity of distilled or demineralized water, water/glycol solutions, and rinse from electroplating, used for measure and control of chemical concentrations

**Analysis Test/measurement Range:**

0.75/15.0 megohm

**Depth:**

10.000 inches

**Voltage In Volts:**

115.0

**Special Features:**

Meter, conductivity

**Width:**

8.000 inches

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A503u0
