General Description:

Wpressure available to column: 7000 psi, pressure with pulse control: 7000 psi, max. Flow rate: 20 ml/min, flow rate/pressure capabilities- 0-4 ml/min at 7000 psi, method of flow rate setting: digital dial, flow rate precision plus or minus 5 pct, flow control method-flow feedback, pulsation controlmethod-flow feedback, max. Solvent volumn before system refill: no limitation, solvent change time-2 min., pressure monitoring: digital readout: 10 psi resolution, overpressure control: 100-7000 psi

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23900
