General Description:

Dissolved oxygen unit measurement range 0-20 ppm, gold/silver polarographic type probe w/polytetrafluoroethylene membrane enclosed in pvc housing, submersible motor driven agitator, 2 in. Dia, 12 in. L; ph unit measurement range 0-14 ph, 4.5 in. Dia, 9 in. L; temperature unit measurement range m5-40 degrees c, encapsulated glass bead thermistor assembly; conductivity unit measurement range 0-65 millimho/cm, 3 in. Dia, 12 in. L; readout monitoring unit, 9.1875 in. W, 13.25 in. L, 11.5625 in. H w/cover; 115 vac or internal rechargeable batteries

Shelf Life:

N/a
