Product Name:

Aquametry apparatus

General Description:

Compact, closed, odorless and moisture proof system for the determination of water by titration; features self powered meter electrode; covers range from 1 part per million to 100 pct water w/1 dual buret w/use of 4 oz jars for reaction vessels; 1 pct accuracy, 0.5 pct reproducibility

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23900
