**Height:**

11.500 inches

**Frequency Rating:**

60.0 hertz

**Accessory Components And Quantity:**

Quartz combustion tubes 2; vycor reduction tube 1; absorber tubes 6; platinum sample seats 10; sample ladles 2; ladle cover 1; calibration standard 1; forceps 1; microspatula 1; chart drive cable 1; furnace shield 1; chemical supplies kit 1; spare coil heaters 2; dust cover 1; instruction manual 1

**Depth:**

28.000 inches

**Voltage In Volts:**

115.0

**Special Features:**

Electric power relationship source: operating; the number of alternating current phase: single

**Width:**

32.000 inches

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A503u0
