Ac Voltage Rating:

115.0 volts

Frequency Rating:

60.0 hertz

Operating Test Capability:

Ranges; 0-2, 0-20, 0-200 ntu

Special Features:

Nephelometric angle 90 degrees measurement ratioed to sum of transmitted light and forward scatter light measurements, method of detection minimizes effects of colored samples, 2% of span plus 1 least significant digit at 25 degrees c repeatability; 1 pct of span plus 1 least significant digit, less than two seconds to reach equilibrium on highest range, stray light, less than 0.01 ntu, 25 mm by 95 mm; threaded top for capping; temp storage range: cm20.0/p60.0

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T228-a
