General Description:

Dual mode electrode, a solenoid-actuated valve interposed in the mercury path between the reservoir and the capillary controls each drop, reservoir capaci type 5 lbs of mercury, capillary 5 in. Lg w/0.006 in. Bore, input gas at pressure not to exceed 5 psi is required, weight of casting 12 lbs, size in cm 26 d x 23.6 w x 40 h

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
