Height:

330.2 millimeters

Current Type:

Ac

Frequency Rating:

Between 50.0 hertz and 60.0 hertz

Accessory Components And Quantity:

Eion-selective electrode analysis of sodium and potassium using 35 microliter of whole blood, serum or plasma and 100 microliter of urine before dilution; interfaced w/printer; temp range 10/35 degrees c

Depth:

269.2 millimeters

Voltage In Volts:

100.0 and 120.0 and 220.0 and 240.0

Width:

279.4 millimeters

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A503u0
