**Features Provided:**

External printer

**Test Sample/specimen Size:**

1 millimeter

**Test Sample/specimen Type:**

Serum or plasma

**Depth:**

1.000 inches

**Special Features:**

Preprogrammed module c/o an optical filter and a program memory which enables the seralyzer system to measure the concentration of triglycerides in a serum or plasma sample; performance characteristics and specifications-units mb/dl, wavelenth 580 nm, test time 60-240 sec, overrange 500 mg/dl, underrange 40 mg/dl, type of reaction-endpoint; encased in plastic cartridge; lgth 3.50 in.; colorimetric analysis

**Width:**

2.500 inches

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A503u0
