Features Provided:

External printer

Test Sample/specimen Size:

1 millimeter

Test Sample/specimen Type:

Serum or plasma

Depth:

1.000 inches

Special Features:

Preprogrammed module c/o an optical filter and a program memory which enables the seralyzer system to measure the concentration of triglycerides in a serum or plasma sample; performance characteristics and specifications-units mb/dl, wavelenth 580 nm, test time 60-240 sec, overrange 500 mg/dl, underrange 40 mg/dl, type of reaction-endpoint; encased in plastic cartridge; lgth 3.50 in.; colorimetric analysis

Width:

2.500 inches

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A503u0
