**Product Name:**

Coagulation timer unit plasma 115/120v 50/60hz ac 200 microliter

**General Description:**

Semiautomatic testing; performs performs prothrombin times, partial thromboplastin times, saline dilutions, factor assays thrombin times, quantitative fibrogen assays, light beam clot detection; integral heating block; c/o instant on; incubator w/thermometer, timer, temperature verification, heated pipet tip tray, off-scale optical indicator light, reagent wells w/magnet stirrers, pipets for reagent injection and automatically starting clot timing; light emitting diode digital readout; 200 microliter capacity; 115/120 volt, 50/60 hz, ac

**Departure From Cited Document:**

Peacetime demand obtain

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No
