Special Features:

Measures potassium for blood chemistry; interact w/ion specific membrane of the electrode; this interaction results in the generation of an electrical potential across the membrane which is measured potentially; the magnitude of potential is proportional to the concentration of the ion in the sample; for use on the abbott spectrum; o/a lg 1.0 in.; o/a wdth 1.0 in.; matl plastic

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A506n0
