**Special Features:**

Includes separate z-80 microprocessor-based temperature controller with keypad and printer; 5-1/2 in. H x 9-1/4 in. W x 10-3/4 in. D; 50 degrees c to 300 degrees c temperature programming in 1 degrees c increments

**General Description:**

115 volts; aluminum housing; 10-1/2 in. H x 13-3/4 in. W x 11 in. D; 296 cubic inch capacity; 50 degrees c to 300 degrees c temperature range; accomodates two detectors operating separately or in series configuration; operable with seven different detectors: photoionization detector (pid), flame ionization detector (fid), thermal conductivity detector (tcd), far ultraviolet absorbance detector (fuva), nitrogen/phosphorous detector (npd), electron capture detector (ecd), and electrolytic conductivity detector (ecd); accommodates three types of injectors: two packed injectors in the heated block or one capillary injector and one packed column injector; pneumatic system for controlling carrier gas flow rates

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A23900
