Body Length:

3.543 inches

Body Material:

Glass

Instrument Type For Which Designed:

Blood gas analyzer

Ph Measurement Range:

+0.00/+800.00

Internal Reference Element Type:

Platinum and silver

Err Default:

Err default

Special Features:

Clark design; optimum temperature range 37 degrees c; oxygen permeable membrane; silver anode, platinum cathode; used on avl blood gas analyzers

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A506n0
