Product Name:

Analyzer mercury detection 100 volts 60 hz self contained

General Description:

C/o atomic absorbance module and fluorescence absorbance module; matl; sheet metal construction; o/a dimensions: 36 in. W x 20 in. D x 20 in. H; analyzes mercury contamination in waste waters, rivers and effluents at 2 ppt, sensitivity from 2 ppt to 200 ppm; sample size 15 ml; performs 30 to 50 samples per hour; 100 volts; 60 hz; self contained; results are video displayed

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
