Product Name:

Fuel test kit

Special Features:

Kit contains p/n fmc001 fuel measurement cylinder; p/n exv001 extraction vessel; p/n rsh001 ring stand vesselholder; p/n wms001 water measurement syringe; p/n web001 water beaker; p/n wdpoo1 water dropper; p/n ref030 refractometer 0-30 degrees; p/n tkc001 test kit case; p/n ins001 instruction manual and p/n fsb001 fuel sample beaker; measures volume percentage of anti-icing additives

Functional Description:

On-site test kit for measuring the amount of anti-icing inhibitors in aviation fuels; allows you to perform the standard test method for the measurement of fuel system icing inhibitors per astm 5006-1990; tests for egme and diegme anti-icing additives

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23800
