Overall Length:

5.000 inches

Overall Height:

5.000 inches

Overall Width:

10.000 inches

Product Name:

Complete oil breakdown rate analyzer

Special Features:

Two 9v alkaline batteries w/low battery indicator; case-heavy duty cast aluminum; indicates-degradation on level of the inhibitor system, trend in the degradation of the inhibitor system, outcome of the trend

Functional Description:

Electrochemically analyzes the quality of the inhibitor system in synthetic oils

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A23900
