Product Name:

Hematology system

Special Features:

Test parameters: white blood cell count to include percent and number...Lymphocyte, monocyte, neutrophil, eosinophil, and basophil. Red blood cell count to include...Hemoglobin, hemacrit, mean corpuscular volume, mean corpuscular hemoglobin, mean corpuscular hemoglobin concentration, red cell distribution width, platelet count, mean platelet volume, platelet distribution width, and plateletcrit.

General Description:

Throughput: 75 samples per hour. Sample size: 185 ul primary sample mode, 125 ul secondary sample mode, 50 ul predilute mode. Data management system (computer): 16 mhz 386 microprocessor, 40 mb hard disk drive, 4 mb ram, 3.5 in. Diak drive, vga color monitor, alphanumeric keyboard. Features: fully automated complete hemogram and differentials; laser-read bar code sample id; automatic calibration; automatic closed-vial sampling; auto-probe wipe on secondary mode for microsamples and predilutes; on-line help instructions; continuous computer monitoring of system performance. Has 1000 patient storage capability including all displays.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
