Overall Length:

16.000 inches

Overall Height:

10.000 inches

Overall Width:

11.000 inches

Special Features:

Variable voltage and frequency; all software operation controlled by five soft keys, four arrow keys, stop, enter, and clear keys, and full numeric keypad; storage of 100 complete pcr methods; time and temperature protocols displayed; default program of pre-pcr, 25 cycle pcr, and post pcr, can be modified to any protocol; runs multiple diagnostic software routines; auto restart function

Functional Description:

Used to amplify nucleic acids for gene research

Type/model Designation:

9700

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
