Height:

18.750 inches

Current Type:

Ac

Frequency Rating:

50.0 hertz or 60.0 hertz

Detector Type:

Photoionization

Test Type For Which Designed:

Total co2, oxygen content, hemoglobin, actual and standard bicarbonate, base excess (ccf), base excess (blood), anion gap

Features Provided:

Stat processing

Method Of Analysis:

Amperometric

Electrode Type:

Not included as an essential characteristic in the specification/cid covering this standard nsn

Test Sample/specimen Size:

85 to 190 microliters

Err Default:

Err default

Err Default:

Err default

Test Sample/specimen Type:

Whole blood

Depth:

19.000 inches

Voltage In Volts:

220.0

Width:

22.250 inches

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A503u0
