Product Name:

Analyzer clin chem kinetic enzyme/rate test

Method Of Analysis:

Kinetic enzyme/rate test

Special Features:

Compact size table top design; closed tube sampling minimizes risk from blood borne pathogens; positive sample and reagent id-no more specimen and reagent confusion with ace's on-board computer that identifies and tracks samples and reagents by lot number, expiration date, and amount of reagent remaining for an ultra-secure, worry-free system; on-board sample and reagent refrigeration-up to 40 separate test reagents may be stored so effects such as exposure to light and evaporation are kept to an absolute ; single probe handles all sample and reagent aspiration and dispense functions; new cuvette for each reaction eliminates chance of cross contamination; immediate stat interrupt; auto repeat and dilution; multi-tasking intelligent software offers individual profile, batch, or stat assays; complete on screen help, color coded prompts and built in self diagnostics that guide every step of the way

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A503u0
