Height:

9.500 inches

Current Type:

Ac

Frequency Rating:

50.0 hertz or 60.0 hertz

Detector Type:

Photodiode

Test Type For Which Designed:

Tests platelet aggregation

Method Of Analysis:

Photometric

Err Default:

Err default

Test Sample/specimen Size:

450 microliters of blood, 450 microliters of saline and 100 microliters chrono-lume reagent for a total of 1 ml.

Test Sample/specimen Type:

Whole blood

Depth:

18.000 inches

Voltage In Volts:

115.0 or 230.0

Special Features:

Two channel impedance system, optical system and luminescence system; two precious metal wires; uses cuvette s p/n 367 to hold blood for testing

Unit Of Issue Weight:

35.00 pounds

Width:

18.250 inches

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A503u0
