Height:

24.000 inches

Current Type:

Ac

Frequency Rating:

Between 50.0 hertz and 60.0 hertz

Product Name:

Analyzer clinical chem kinetic enzyme/rate test 100/120v50/60hz

Method Of Analysis:

Kinetic enzyme/rate test

Depth:

25.800 inches

Voltage In Volts:

100.0 and 120.0

Special Features:

Hcompact size table top design; requires 36 inches above analyzer; takes up only 4 square feet of space; closed tube sampling minimizes risk from blood borne pathogens; with next on-board computer that identifies and track samples and reagent by lot number, expiration date and amount of reagent remaining for an ultra-secure, worry free system; up to 150 samples and 20 separate test reagents may be placed on-board and effects such as exposure to light and evaporation are kept to an absolute ; single probe handles all sample and reagent aspiration and dispense functions; new cuvette for each reaction eliminates chance of cross contamination; up to 58 cuvettes can be stored on-board at anytime; immediate stat interrupt; auto repeat and dilution; multi-tasking intelligent software offers individual profile, batch or stat assays; integrated computer, monochrome monitor; external printer and related supplies; color coded prompts; built in self diagnostics

Unit Of Issue Weight:

124.00 pounds

Width:

27.500 inches

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A503u0
