Special Features:

Ultrameter measures conductivity/tds/resistivity/ph/orp/temperature; fast and accurate either in hydroponics, in the factory, in the boiler room, in lab or for use in the field; memory easily stores & recalls up to 20 readings; fully auto temp compensation; user adjust temp; user adjust conductivity/tds conversion ratio, auto shut off; no volatile microprocessor provides data back up; custom lcd with annunciators & prompts to simplify calibrations & indicate conditions such as over range and low battery; lightweight - it floats; large capacity kci reservoir guarantees extended life, it is user replaceable; built in electrodes for maximum protection; advanced 4 electrode cell for conductivity/resistivity/tds eliminates polarization for greater accuracy, stability and minimal maintenance; custom lcd display

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
