End Application:

For use with nsn 6665-01-523-4902, back-pack, biological identification system

Product Name:

Detection system biological agent jbaids (1) system per package

Special Features:

Weight including components is 38 pounds; size: 19.4" x 14.3" x 10.5"; detector is a field hardened rapid thermocycler with concurrent fluorescence monitoring; the system is capable of automatically analyzing samples for the presence of any dna sequence; easy to use software allows the system to automatically collect the data, interpret the test data, and report the results in less than 30 minutes; up to 32 prepared test samples may be amplified and analyzed in less than 30 minutes

Supplementary Features:

Sterile, reusable

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
