Overall Height:

255.0 millimeters

Overall Width:

125.0 millimeters

Housing Material:

Metal

Special Features:

Pre-filled sterile agar cassettes; simple colony counting through integrated grid; 316 stainless steel micro-perforated sieve; anodized aluminum sampling head; epoxy-coated aluminum body; 140l/min for first 500 l, then 180l/min air flow

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T149-b
